

METER- CANOPY

Greenglobe designed and developed Gas Meter Canopies mainly for installation on Commercial and Industrial Gas Meters of various makes and capacities. The purpose to install Gas Meter Canopy is to protect Gas Meters from abnormal eventualities like meter reading tempering and unauthorised damages which indirectly causing loss to Gas Distribution Companies.

Gas Meter Canopies manufactured from high strength and finest quality Fiber Reinforced Polymers (FRP). The designs of Gas Meter Canopies are robust, strong and sturdy in construction with high durable and cost effectiveness. These gas meter canopies are light in weight and are easy & economical to install. Manufactured using high strength and special grade of FRP material under specified process, Gas Meter canopies are temperature, pressure, water, chemical and corrosion resistant and able to withstand severe vibrations and does not crack or peel off in all weather conditions. Due to absolute maintenance free product and does not require any painting, Gas Meter canopies have longer service life.
