

SKIDS AND MODULES

**Greenglobe is specialized
in the supply of**

- District Regulating Skids (DRS)
- Metering Regulating Skids

These skids are incorporated with Filter, Pressure Regulators and Metering devices as per the requirements of Gas Distribution Companies.

All the skids are designed and fabricated as per the International Standards and thus ensure a flawless gas supply to the downstream network.

Thanks to its multi stage Safety shut off systems, which make it as leader and one of a highly reliable & trouble free unit in its segment.

The skids are designed, fabricated , assembled, and finally fully tested and then packaged before transported to site. Controlling the Skid remotely is also possible in GREENGLOBE make skids.

Apart from the bigger skids, GreenGlobe also involved in small size regulation modules up to 200 scmh for domestic applications. These modules are consist with easily removable filter, pressure regulator and flow control valves along with Pressure tap offs at appropriate location.
